Federal Communication Commission  
1919 M Street NW  
Washington, DC 20554

Dear Sirs:

I am very concerned about proposed rules that are currently under consideration by the FCC under PR Docket 92-235. If adopted, the new rules will greatly reduce the usability of frequencies currently assigned for model use and increase the risk of accidents and attendant liability for controlling model airplanes.

Our radio frequencies are in the 72-76 MHz band. This band is primarily used for private land mobile dispatch operations. However, our radio control frequencies in this band are far enough apart from the land mobile frequencies that we have been able to share the band without either use interfering with the other.

I object to the addition of other frequencies near those that are currently used by radio controlled aircraft and surface vehicles. Please amend this proposed rule to allow the continued safe and enjoyable use of all frequencies assigned to modeling activities.

Sincerely,

*Edward R. Cenkner*
